brings visibility to
Congress Centre events.

3

Versatile space to host
various types of events.

4

Personalised product
offering and promotional
packages.

5

Customer support
and accompaniment
services.

TecnoCampus

The TecnoCampus is a technology park based in the city of Mataró, in the Maresme region. As well as striving to be a project of national and international projection, it is a firm pledge by the region towards contributing decisively to its own economic and social transformation.

The TecnoCampus Congress Centre is a symbol for finding talent on the European Mediterranean coast.

Its location at the TecnoCampus technological park, a radar for innovation and company creation, gives the Congress Centre the perfect ecosystem to stimulate business talent and provoke the entrepreneurial spirit.

Located right in front of the sea, in a clearly Mediterranean environment, where the university and business find their perfect point of contact, the TecnoCampus Congress Centre offers the optimum context to hold all kinds of events.

Spaces

The Congress Centre has a surface area of more than 2,400 m². The facilities consist of an Auditorium of 950 m², a Foyer of 900 m², two modular rooms of 75 to 150 m² and high-level academic classrooms of various capacities, all equipped to meet the highest demands.

Our team of professionals boasts expertise, creativity and the highest quality in all of the services they offer.

Auditorium

Floor -1

The Auditorium holds 323 people and has all the equipment that may be required to successfully carry out all kinds of event. This includes projector, screens, PA system with several types of microphones, 3 cabins for simultaneous interpreting and a VIP room.

Surface area: 950 m²

Uses: Congresses, symposiums, conferences

Capacity: 323 people

3 simultaneous translation booths

VIP room for speakers, attached to the auditorium stage

Wifi

Central screen and two side screens

Burriac Room Laia l'Arquera Room

Ground floor

The two rooms are located on the ground floor, on a higher level than the Auditorium and Foyer, and are contiguous and panelled, so that they can become a larger room. These rooms are perfect for holding business meetings or relay overflow sessions at congresses. The main idea of these rooms is to optimise group dynamics in a business context.
